Lagos • +2349124634152 • bolu4good@gmail.com • linkedin.com/in/bolu-ajayi • https://boluajayi.netlify.app/

## Software Engineer

Software Engineer with 5+ years of experience building high-performance web and mobile applications using React.js, Next.js, Node.js, and React Native. Skilled in scalable backend services, microservices, real-time features, and cloud-based solutions. Proven track record improving performance, leading development teams, and delivering user-centric products for startups and enterprise clients.

## SKILLS

**Frontend:** Axios, CSS3, HTML5, JavaScript, Next.js, React.js, React Query, Redux, REST, Tailwind CSS, TypeScript, Vue.js, Zustand

**Server-Side & Backend:** API Design & Integration, Authentication & Authorization (JWT, Caching & Performance Optimization, Express.js, Microservices, MongoDB, Node.js, OAuth), PostgreSQL, Python, Redis, WebSockets

**Mobile Development:** Android Studio, iOS Development, Kotlin, Maps & Location Services, Push Notifications, React Native, Real-Time Tracking

**DevOps & Cloud:** AWS (EC2, CI/CD Pipelines, CloudFront, Docker, GitHub Actions, Jenkins, Lambda), Linux, Load Balancing, Nginx

**Tools & Workflow:** Figma, Git, Jira, Lighthouse Performance Optimization, Postman, Scrum/Agile, Socket.io, TDD & Unit Testing (Jest)

## WORK EXPERIENCE

**Auqli Limited**  
**Software Engineer | Tech Lead • Full-time**

**Oct 2024 - Present**  
**WA (Remote), Seattle**

- Architected and developed a live shopping and community platform using Node.js, Express, MongoDB, and a microservices architecture.
- Built real-time streaming, buyer-seller messaging, live comments, and interactive reactions using WebSockets, significantly increasing user engagement and average session time.
- Designed and implemented personalized infinite-scroll “blip” recommendation algorithms that surfaced relevant content based on user interest, engagement history, and seller-following data, improving retention and repeat watch time.
- Optimized backend architecture and API performance through caching, database indexing, and load balancing, resulting in a 30% reduction in latency during peak usage.
- Led an agile engineering team, managed sprint planning, and ensured on-time delivery of high-impact features.

**Innoteris**  
**Frontend Engineer • Contractor**

**Apr 2024 - Jul 2025**  
**Nigeria (Remote), Lagos**

- Developed and maintained multiple production applications for clients, including a full e-commerce platform and a logistics admin dashboard used to assign and manage delivery partners across regions.
- Built a React Native mobile app for delivery personnel featuring real-time map tracking, route updates, live delivery status, and push notifications, improving delivery accuracy and response time.
- Implemented clean UI architecture with reusable components, responsive layouts, and efficient state management using Redux and TypeScript.
- Integrated REST APIs, maps, and location services to enable real-time data flow between admin dashboards and drivers in the field.

**Mylegalsoftware**  
**Lead Frontend Engineer • Full-time**

**Apr 2023 - May 2025**  
**New York (Remote), Hicksville**

- Web App Optimization: Achieved 97% performance and 100% SEO scores for web apps using Next.js, lazy loading, and API optimization.
  - Designed admin dashboards with real-time analytics and D3.js/Chart.js visualizations for internal stakeholders.
  - Built cross-platform React Native apps for iOS and Android with Redux-based state management.
- 
- Led frontend architecture, CI/CD, code reviews, and TDD, improving code quality and deployment efficiency.

**Falcon Aerospace Limited**  
**Frontend Engineer**

**Sep 2023 - Nov 2024**  
**Nigeria, Lagos**

- UI/UX Development: Created high-performance interfaces for private jet bookings, improving customer satisfaction and engagement.
- Data-Driven Improvements: Used analytics and feedback to optimize UI/UX, reduce load times, and increase retention.
- Collaboration: Worked with cross-functional teams to integrate best practices in design and performance tuning.

EDUCATION

**Masters of Science in Information Technology: Software Engineering**  
Leeds Beckett University

**Leeds, United Kingdom • Sep 2025 - Sep 2026**

Focus areas: Advanced Software Engineering, Cloud Computing, and Agile Development

**Bachelors of Science in Computer Information Systems**  
Covenant University • GPA: 3.9

**Ogun State, Nigeria • Sep 2018 - Aug 2022**

CERTIFICATIONS

**JavaScript Algorithms and Data Structures**  
Free Code Camp

**Advanced React**  
Coursera

**Frontend Development Complete Guide**  
Udemy
